Dear Subscribers:

We're making a change! We've noticed that most of the demand has been for products concentrated on an early introduction to braille literacy, so Special Collection is shifting focus to our youngest readers (ages 0-6) through our Dots for Tots collection.

Dots for Tots books are uniquely designed to spark the interest of the early reader. They provide an engaging story and a manipulative for the child to interact with during story time. A fun companion to the story, the manipulative reinforces a central idea or theme that is present in the pages of the book. The Dots for Tots kits are a great way to help build and strengthen important concepts while fostering an early love of reading.

We will continue to provide blind and visually impaired children with FREE braille books and story-kits. This catalog offers a selection of six Dots for Tots titles. Please keep in mind that limited quantities and kits are offered on a first-order, first-serve basis.

We still encourage older readers to utilize our Digital Dots collection. These are downloadable books in braille for older students. Please visit: <https://www.brailleinstitute.org/special-collection>.

Thanks so much for your interest in our Special Collection program! We remain committed to our mission of promoting braille literacy and appreciate the support of all of our subscribers. If you have any questions, please contact Manolita Gonzalez at [SpecialCollection@BrailleInstitute.org](mailto:SpecialCollection@BrailleInstitute.org) or call (323) 210-2550.

Happy Reading!
